8. Shirley made my experience very pleasant. She's changed my life by listening to me and has been me for who I am. This is the best mental health service I have interacted with (and I have seen a lot)

9. The staff were very kind and supportive, and the communication was always helpful. The down side is the waiting list – I waited 16 months from application to appointment and that was a difficult thing to do. The format of the assessment is calm and friendly which is very good because it's a nerve wracking process.

11. I got the outcome I wanted. The lady who took it was very nice and helped me to relax as I hate being asked questions. I am very happy as I know I have autism.
12. The people here have helped to make the experience less stressful and more comfortable.
13. The application process itself is complicated with long waiting time for getting application forms, but the interview process itself was friendly and helpful.
14. Very helpful and informative and welcoming.
