

ICCS Summit Agenda

- 9:30-15:00 4th March 2026
- Location: Sophia Gardens

Purpose

The Summit is aimed to be a full day workshop designed to bring together leadership from across health and social care partners in Cardiff and Vale. The aim is to shape the future direction of community services for adults and older people, aligning the strategic ambitions across partners and enabling the co-design of a future model and next steps to delivering it.

Objectives

- To develop a shared understanding of what we mean by an Integrated Community Care System in Cardiff and Vale.
- To have a shared understanding of the demographic changes and implications on expected demand for the next 5-10 years (the case for change)
- To increase the mutual understanding of our partner organisations, their strategies, priorities, delivery programmes and risks, and to make connections (operating frameworks).
- To identify the key areas of opportunity for development, next steps and who might be best place to take this forward/by when

Time	Activity
